

# BUSINESS INTERNET

True flat rate business internet connectivity.

## Access Media

VDSL2+  
UFB Fibre  
Dark Fibre

## Traffic Plans

Fair-Share  
Committed Rate

There are two components to our OnNet Internet service. Access is the service that delivers connectivity to your business's premise. Traffic is the service that delivers you connectivity nationally and internationally to the internet.

We are working with Chorus to provide your business

access to Ultra Fast Broadband (UFB), New Zealand's fibre future. This helps us insure that you can get the best quality service delivered on optical fibre no matter where you are in the country.

At OnNetworks we provide TRUE flat rate internet so you always know what your

monthly costs are. We don't believe in data caps or penalising you with overage charges. With OnNet you can share one traffic plan across multiple sites / access connections. If you are a business that operates in one or many regions around the country OnNet can provide you with performance and cost saving benefits today.

# Product Specifications

OnNetworks have chosen to work with New Zealand's leading access provider Chorus to insure that you get the best quality access media. Access media means high speed copper, optical fibre and provides your connection back to OnNetworks. Once we have established the best type of access connection available we can match it with the right traffic plan for your day to day usage.

Plan	UFB VDSL2	UFB Fibre	Dark Fibre
Access Media	Copper	Shared Fibre	Unlit Fibre
Download Speed	30 Mbps	100 Mbps	1Gbps
Upload Speed	10 Mbps	50 Mbps	1Gbps
Installation & Hardware	💰	👍	💰
OnAir Wireless AP Included	💰	💰	👍
OnAir Managed Available	👍	👍	👍

## Traffic Plans National / International Bandwidth

How do we separate **Fair-Share** and committed without providing a Monthly Data Cap? No matter what plan you are on, all of our customers have access to the full power of our connection to our upstream providers national backbone and out to the global internet. Our unique traffic management software prioritises and balances the traffic so you get your **Fair-Share**.

Plan	Fair-Share	Committed
Access Plan	UFB VDSL & Fibre	UFB & Dark Fibre
Data Cap	None	None
Guaranteed International Bandwidth	<b>Fair-Share</b>	1, 2, 4 Mbps Plans
Guaranteed National Bandwidth	<b>Fair-Share</b>	4, 8, 16 Mbps Plans
Burst Bandwidth Included	👍	👍
Static IP Included	👍	👍
Traffic Reporting	👍	👍

OnNetworks is a fully owned subsidiary of Knossos Networks Limited.
