

LIVERTON

TECHNOLOGY GROUP

WELLINGTON, NEW ZEALAND, 1 OCTOBER 2015

New Zealand Technology and managed services provider, Liverton Technology Group Limited, is pleased to announce it has acquired the business and assets of Knossos Networks Limited and sister company On Networks Limited, including its customer base.

Knossos and On Networks are managed network, ISP and VOIP providers specialising in the hotel, hospitality and SME vertical, with particular focus in the lower north island.

Liverton CEO Justin De Lille comments,

“This is Liverton’s third acquisition, and expands and complements our existing ISP and managed network business, which provides ISP and managed network services in New Zealand, Australia, Philippines, and USA. Furthermore, this broadens our product suite to include VOIP and hosting services, as well as providing a richer product experience and support base for all existing Knossos and OnNetwork customers.”

As part of the purchase, Knossos & OnNetworks Director Don Stokes will be joining Liverton as Network Manager, deepening Liverton’s technical expertise. Don’s strength and technical ability are well recognised in New Zealand, having over 30 years’ experience in the ICT space and being one of the original architects of the internet in New Zealand in the early 90’s.

All existing Knossos and On Networks customers will continue to be supported by their existing account manager and will transition across over the next few months.

In addition Liverton has recently appointed a new General Manager of Services and Solutions, Ian Perry, to drive our public sector business in New Zealand and Australia.
